### RECOMMENDATIONS

- IPL recommends to make necessary testing prior to full production.
- Staggered pattern is recommended for greater stability.
- Double faced pallets with close together boards on both sides are recommended for best results.
- To improve stability, release air from container when putting the lid.

### OPENING AND CLOSING

TO OPEN: Break the Tamper-Evident tab, then remove lid.

TO CLOSE: Snap the lid at break tab area first, then follow all around while releasing air by pressing the center of the lid to burp container. If using a closing device, use proper burping devices.

Fillers, lid, pail denesters and lidding devices are also available in a variety of combinations. Everything can be seen on brochures and video tape. Live demonstration on site can be done on demand.

### PACKAGING OF EMPTY CONTAINERS/LIDS

No double stacking, racking recommended.
