

# FlapNest™ 2717-12

ATTACHED LID NESTABLE CONTAINERS

## A Bigger Box for Tough Retail Environments

The IPL FlapNest™ 2717-12 is a premium attached lid nestable container with innovative features that bring unprecedented cost savings and efficiencies to tough retail and wholesale distribution environments. FlapNest™ containers stack with lids flapped shut and nest with lids flapped open to combine product protection and security with efficient return shipping and storage. IPL FlapNest 2717-12 containers can decrease operating cost by dramatically reducing container breakage, storage and freight charges, risk of lost production time due to injuries, content theft damage and more.

### Key features of the FlapNest™ 2717 include:

- **Improved worker safety & productivity:** All-plastic hinges reduce the risk of lost time due to on-the-job accidents and workman's compensation claims commonly associated with wire hinges. Plastic hinges are easily repaired and increase recycle scrap value.
- **Reinforced, double wall collar:** Provides added protection against corner and collar damage in rough environments.
- **Superior lid strength:** Computer-aided design engineering optimizes inside lid area with additional ribbing to reinforce strength and minimize damage in high stress areas around the perimeter.
- **All-plastic hinge design:** Tamper-resistant and tamper evident hinges reduce theft when properly secured.
- **Enhanced security features:** Including tie-wrap and clip compatibility, and positive strapping locations in both directions.
- **Industry leading nesting ratio:** Superior 5-to-1 nesting ratio to reduce return shipping and storage costs.
- **Ergonomic handle design:** Handle style allows easy access when containers are nested.
- **Patented leak-resistant lids:** Reduces the risk of contamination and content damage.
- **Compatible footprint:** Designed for compatibility with existing industry standards and with totes from other manufacturers.
- **De-nest ribs:** Increase handle access and compatibility of other brands when nested (optional).
- **Heavy-duty reinforced bottom:** Additional ribbing prevents container damage with heavy usage (optional).
- **Recycling service:** Integrated damaged container recycling services further reduce costs (optional).

### FLAPNEST™ 2717 DISTRIBUTION APPLICATIONS INCLUDE:

- dry goods
- automotive aftermarket parts
- large retail items
- office products
- manufacturing and many more

# FlapNest™ 2717-12

## Advanced Design Technology

The FlapNest 2717 builds upon the proven elements and innovation that have made IPL attached lid nestable containers the best in the world. Working extensively with industry leaders, IPL applied a form-follows-function design approach to optimize the FlapNest 2717 design to reduce total operating costs in shipping bulky dry goods such as automotive parts from distribution centers to retail and wholesale outlets.

FLAPNEST™ 2717-12 SPECIFICATIONS														
Model	Options	Maximum Outside Dimensions Inches, (cm)			Minimum Inside Dimensions Inches, (cm)			Net Collar Height Inches (cm)	Nesting Ratio	Capacity ft <sup>3</sup> (l.)	Weight Standard lb. (kg)	Weight Heavy Duty (kg)	Quantity per 45"x54" Pallet Empty*	Quantity per 53' T/L Empty*
		L	W	H	L	W	H							
2717-12	Open, Solid, Holes De-Nest Ribs	27.4 (696)	17.0 (432)	12.6 (320)	23.6 (600)	13.9 (353)	11.5 (292)	2.5 (63)	5 to 1	2.43 (67 liters)	8.2 (3.72 kg)	8.45 lbs (3.83 kg)	148	3256

\* Pallet and truckload quantities listed are for full truckload shipments of high cube 53' trailers only.

## Innovative Plastic Containers from IPL

IPL is a leader in the development and manufacturing of innovative reusable plastic containers to suit a wide range of market- and customer-specific requirements. If you are interested in the FlapNest™ Attached Lid Nestable technology, but do not see the size or features you require here, please let us know. IPL will work with you to develop a container that will optimize the efficiency of your handling and distribution program.
